

Names, Diseases, Drugs	Concepts and Vocabulary
<i>Plasmosium</i>	Vaccines/immunizatons
<i>Anopheles</i>	Live, attenuated vaccines
<i>Toxoplasma gondii</i>	Inactivated, killed vaccines
<i>Trichomonas vaginalis</i>	Subunit vaccines
<i>Trypanosoma</i>	mRNA vaccines
<i>Entamoeba histolytica</i>	Oncoviruses
<i>Enterobius vermicularis</i>	Prodrug
<i>Taenia</i>	Neuraminidase
<i>Chlamydia trachomatis</i>	Eukaryotes
<i>Treponema pallidum</i>	Erythrocytes
<i>Neisseria gonorrhoeae</i>	Anemia
<i>Candida albicans</i>	Jaundice
<i>Gardnerella vaginalis</i>	Renal failure
<i>Staphylococcus aureus</i>	Prophylactics
<i>Yersinia pestis</i>	SCA and Malaria (know genetic resistance/heredity)
<i>Neisseria meningitidis</i>	Homozygous dominant
<i>Bordetella pertussis</i>	Heterozygous dominant (carrier)
<i>Salmonella enterica</i>	Homozygous recessive
HPV	Romañas eyes
HSV-4 (EBV)	Kissing bug
HSV-8	Winterbottom's sign
HSV-2	Tsetse fly
HepA, HepB, HepC	Oral rehydration therapy (ORT)
HIV	Fontanelles
Ebola virus	Skin turgor
Cervical cancer	Capillary refill
Lymphomas	Tachycardia
Kaposi's sarcoma	Tachypnea
Malaria	Intracellular
Sickle cell anemia	Purulent discharge
Toxoplasmosis	Dysuria
Trichomoniasis	Cervicitis
Trypanosomiasis	Urethritis
Changas' disease	Salpingitis
Sleeping sickness	Infertility
Amoebiasis	Pelvic inflammatory disease (PID)
Dysentery	Ectopic pregnancy
Chlamydia	Primary, secondary, tertiary syphilis
Syphilis	Chancres
Gonorrhea	Gummas
Genital herpes	Argyll-Robertson's pupil
Genital warts	Endocarditis
Viral hepatitis	Ophthalmia
Vaginitis	Pharyngitis
	Proctitis

AIDS	Encephalitis
Endocarditis	Arthritis
Hemorrhagic fever	Cryosurgery
Plague	Excision
Impetigo	Electrocautery
Cellulitis	Clinical definition of AIDS
SSSS	Nonspecific immunity (innate)
Meningitis	Specific immunity (acquired)
Meningoencephalitis	Skin
Pertussis (whooping cough)	Mucous membranes
Salmonellosis (typhoid fever)	Lacrimal glands
Fever	
Inflammation (rubor, calor, tumor, dolor)	
Nucleoside analogs	Phagocytic white blood cells
Azidothymidine (AZT) – Retrovir	CD4 and CD8 T cells
Acyclovir – Zovirax	T cells (TH, TREG, Tc)
Valacyclovir – Valtrex	B cells
Ribavirin – Copegus	Plasma cells
Competitive enzyme inhibitors	Antibodies/immunoglobulins
Oseltamivir – Tamiflu	Antigens
NNRTIs	Thymus
Efavirenz – Sustiva	Lymph
Interferons	Perforin
Pegylated interferon $\alpha$ -2a – Pegasys	Neutralization
Opsonization	
Chloroquine – Aralen	Complement activation
Mefloquine – Larium	Bacteremia
Pyrimethamine – Daraprim	Sepsis (septicemia)
Metronidazole – Flagyl	Lumbar puncture
Loperamide – Imodium AD	DTaP vaccine
Pyrantel – Pin-X	
Praziquantel – Biltricide
