

Microbiologists, microbe names, drugs, diseases	Vocabulary and concepts
Linnaeus	Microbiology and microbes
Leeuwenhoek	Binomial nomenclature
Jenner	Genus and species
Pasteur	Bacteria
Semmelweis	Prokaryotes vs. eukaryotes
Lister	Protists
Koch	Helminths
Fleming	Fungi
Marshall	Viruses
<i>Escherichia coli</i>	Prions
<i>Naegleria fowleri</i>	Vaccine
<i>Dracunculus medinensis</i>	Spontaneous generation
<i>Candida albicans</i>	Biogenesis
<i>Saccharomyces cerevisiae</i>	Aseptic techniques
<i>Acetobacter</i>	Nosocomial (hospital-acquired) infections
<i>Bacillus anthracis</i>	Koch's postulates
<i>Penicillium</i>	Germ Theory of Disease
<i>Helicobacter pylori</i>	Competitive exclusion
<i>Streptococcus pneumoniae</i>	Peptic ulcers
<i>Mycobacterium tuberculosis</i>	Symptoms vs. signs
<i>Mycobacterium leprae</i>	Anemia
<i>Clostridium difficile</i>	Esophagogastroduodenoscopy
<i>Clostridium botulinum</i>	Urea breath test
<i>Clostridium tetani</i>	Antacid
<i>Gardnerella vaginalis</i>	Acid secretion inhibitor
<i>Lactobacillus</i>	Antibiotics
Influenza virus	Micrometers (microns)
Cowpox	Nanometers
Smallpox	Relative sizes of microbes
Phenol	Simple stain
Penicillin	Differential stain
Bismuth subsalicylate ("Pepto-Bismol")	Gram stain (know steps)
Omeprazole ("Prilosec")	Peptidoglycan
Clarithromycin ("Biaxin")	Lipopolysaccharide
Metronidazole ("Flagyl")	Negative stain
Mad cow disease/bovine spongiform encephalopathy (BSE)	Capsules
Creutzfeldt-Jakob disease (CJD)	Flagellar stain
Chronic wasting disease (CWD)	Motility
Anthrax	Atrichous, monotrichous, peritrichous, amphitrichous, lophotrichous
Leprosy/Hansen's disease	Acid-fast stain
CDIFF	Endospore stain
Botulism	Endospores
Tetanus	
Floppy baby syndrome/infant hypotonia
