

Scientific names and diseases	Vocabulary and concepts
<i>Propionibacterium acnes</i> (bacteria; acne)	Tinctures
<i>Chlamydia trachomatis</i> (bacteria; STD)	QUATS (quaternary ammonium compounds)
<i>Neisseria gonorrhoeae</i> (bacteria; STD)	Bactine; benzalkonium chloride
<i>Treponema pallidum</i> (bacteria; STD)	Heavy metals
HHV-2 (virus; genital herpes)	Silver nitrate, Mercurochrome, zinc chloride, copper
HPV (virus; cervical cancer, genital warts)	Oligodynamic effect
Vaginitis	Peroxygens
<i>Candida albicans</i> (fungus; STD)	Hydrogen peroxide, benzoyl peroxide, ozone
<i>Gardnerella vaginalis</i> (bacteria; STD)	Aldehydes
<i>Trichomonas vaginalis</i> (protozoa; STD)	Formaldehyde, glutaraldehyde (Cidex)
HepA (virus; hepatitis)	Z-pak (azithromycin)
HepB (virus; hepatitis)	Chancres, gummas
HIV (virus; AIDS)	1 <sup>st</sup> line, 2 <sup>nd</sup> line, 3 <sup>rd</sup> line of defense
<i>Plasmodium</i> (protozoa; malaria)	Inflammation (rubor, dolor, tumor, calor)
<i>Yersinia pestis</i> (bacteria; plague)	White blood cells (leukocytes)
<i>Francisella tularensis</i> (bacteria; tularemia)	Antigens, antibodies
<i>Borrelia burgdoferi</i> (bacteria; Lyme disease)	B cells and T cells
HHV-4 (EB virus; mononucleosis)	Neutralization
Ebola (virus; hemorrhagic fever)	Oponization
Measles (virus; rash)	Agglutination
Rubella (virus; rash)	Helper T cells
Roseola (virus; rash)	Cytotoxic (killer) T cells
<i>Staphylococcus</i> (bacteria):	Regulatory T cells
Endocarditis, impetigo, cellulitis, SSSS, MRSA, VRSA	CD4 T cells
<i>Acanthamoeba</i> (protozoa; keratitis)	Naturally-acquired immunity
<i>Neisseria meningitidis</i> (bacteria; meningitis)	Artificially-acquired immunity
<i>Streptococcus pneumoniae</i> (bacteria; meningitis)	Vaccines (immunizations)
<i>Haemophilus influenza</i> (bacteria; meningitis)	Live attenuated vaccine
<i>Listeria monocytogenes</i> (bacteria; meningitis)	LAIV
<i>Naegleria fowleri</i> (protozoa; meningoencephalitis)	Killed vaccine
<i>Toxoplasma gondii</i> (protozoa; encephalitis)	Subunit vaccine
<i>Clostridium botulinum</i> (bacteria; botulism)	Titer
Gonorrheal neonatal ophthalmia	Bubo
PID (Pelvic inflammatory disease)	Epidemiology
AIDS-defining illnesses	Erythema migrans
Candidiasis; fungus	Oncovirus
Herpes; virus	Sebum
Kaposi's sarcoma; virus (HHV-8)	Normal microbiota
Tuberculosis; bacteria	Lysozyme
Cryptosporidiosis; protozoa	Desquamation
Warts; virus	Salicylic acid
Leishmaniasis; protozoa	Cryosurgery
Anthrax; bacteria	Eschars
Cutaneous mycoses; fungus	Tinea

Conjunctivitis TSE (prions; Mad Cow Disease) Maculopapular rashes Vesicular (pustular) rashes Primary, secondary, tertiary syphilis Allergy Atopy Hay fever (allergic rhinitis; antihistamines) Eczema (atopic dermatitis; hydrocortisone) Anaphylaxis Contact dermatitis Type I diabetes Multiple sclerosis Rheumatoid arthritis Lupus	Lactoferrin Photophobia Lumbar puncture
