

## **Instructions for Project – Alternative Performance**

I want you to find and research some sort of alternative performance, falling in the 20<sup>th</sup> or 21<sup>st</sup> centuries. The 20/30 minute (and I will be timing you, so you rehearse the lecture and performance) presentation will consist of a lecture and demonstration.

### **Lecture**

- Requires a handout – you **don't read** the handout as your presentation, instead it serves as clarification and a **reference** source for me and your fellow classmates.
- Visuals – for clarification only. These need to be brief.
- You must cover:
  - a general description performance
  - a brief history of the time in which it was prevalent
  - what is the connection between the time and the thing (why do you think it took place in history the way it did) (do you think the thing had an impact on the world large or small) (In other words, why should we care?).

### **Performance**

Give us a demonstration.

### **Paper**

2-4 pages about what you found out by researching. THEN, I want you to end with a paragraph about what you found interesting about the research. MLA 10<sup>th</sup> edition. Cite sources and include a bibliography.
