

Lecture Quiz 1 breakdown

Ch 4 part 1 (neurons and neurotransmitters) – 25 questions

2 on ion channels that, when open, cause an EPSP or IPSP

4 on glial cells

2 on vocabulary of neurotransmitter signaling (EPSP, IPSP, graded potential, summation)

6 on ACh and its receptors in parasympathetic (autonomic) responses, and voluntary skeletal muscle activity

7 on causes of cholinergic syndrome, DUMBBELSS, and its treatment

3 on toxins and ACh signaling

1 on ACh signaling in Alzheimer's vs Myasthenia gravis
