

Lecture quiz 3 breakdown: (Ch 11 – respiratory physiology) – 25 questions

1 on conduction vs respiratory zones

1 on alveolar cells

6 on respiratory vocab (eupnea, dyspnea, apnea, surface tension, compliance, recoil, hyperventilation, hypoventilation)

8 on respiratory disorders (pulmonary fibrosis, pneumothorax, pneumonia, COPD, emphysema, asthma, cystic fibrosis, silicosis, anthracosis, mesothelioma, ARDS, IRDS, lung cancer)

2 on mechanism of respiration (respiratory muscles, thoracic volume, lung volume, and intrapulmonary pressure)

2 on respiratory acidosis and alkalosis, and negative feedback pathway to correct them)

2 on lung vocab (parietal pleura, visceral pleura, intrapleural space)

2 on hemoglobin disorders

1 on gas exchange of blood vessels and body tissue
