Voluntary Motor responses
Involuntary Motor responses
Ascending info.
All voluntary motor movement involves _____ neurotransmitter binding to _____receptors.
Parasympathetic Motor responses
_____ nerves
heart rate _____
BP _____
bronchioles _____
GI peristalsis _____
GI secretions _____
GI arterioles _____
_____ nerves
urination _____
defecation _____
All parasympathetic motor responses work by _____ neurotransmitter binding to _____ receptors.
Sympathetic Motor responses
_____ nerves
heart rate _____
BP _____
bronchioles _____
GI peristalsis _____
GI secretions _____
GI arterioles _____
skeletal muscle arterioles _____
_____ nerves
urination _____
defecation _____
All sympathetic motor responses work by _____ neurotransmitter binding to what 3 types of adrenergic receptors?
_____ - which controls what?
_____ - which controls what?
_____ - which controls what?
