

Regulation of blood osmolarity

Stimulus = High Blood Osmolarity

Sensor/integrating center = _____

Secretes _____

Organ(s) targeted by this is: _____

which causes:

- _____ water reabsorption
- _____ urine output
- _____ blood volume & pressure
- _____ blood osmolarity

Stimulus = Low Blood Osmolarity

Sensor/integrating center = _____

Inhibits _____

which causes:

- _____ water reabsorption
- _____ urine output
- _____ blood volume & pressure
- _____ blood osmolarity
